

#### issue 4

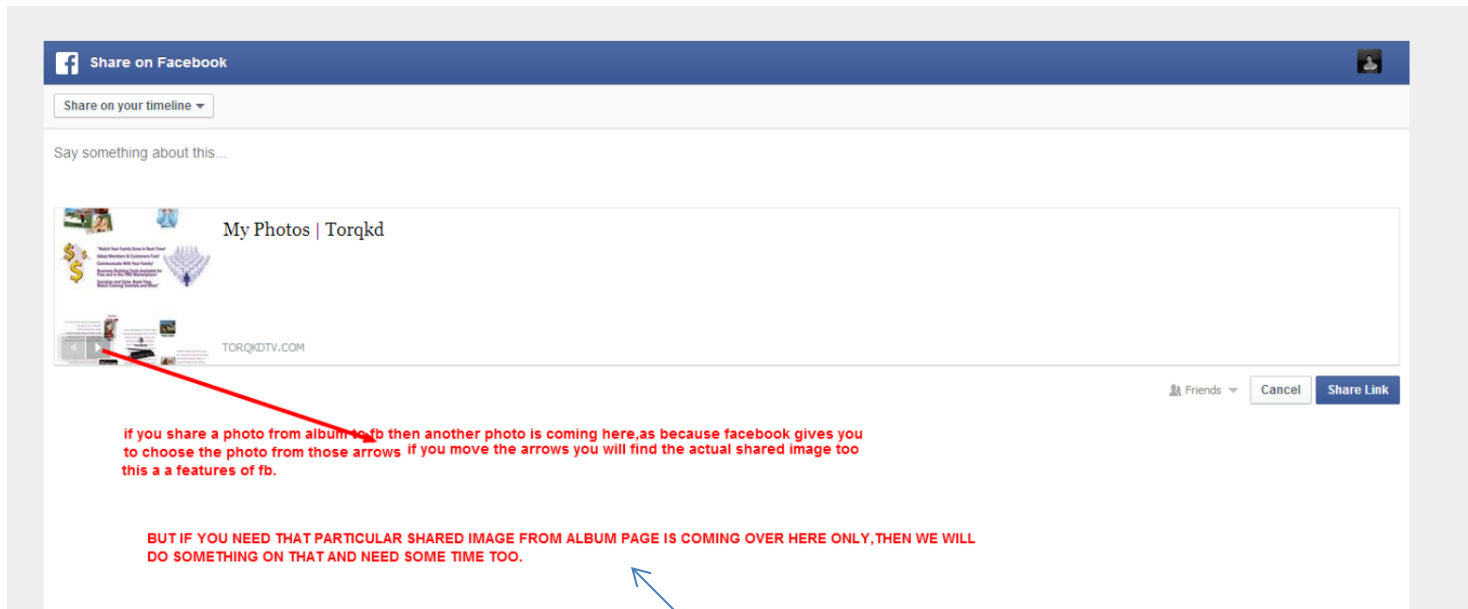

to put comment a video or a photo from album you just need to click over them(any one of them ) and a pop comes up (with that selected photo or video) with a input box and a post button,now if you put something on that input box and click on the post button your comment for that particular photo or video is posted.

**The functionality is done we will complete design asap too !!**

see this to put a comment

<https://docs.google.com/file/d/0B3rh8egX8A2idjFSX1p3T2tJd1U/edit?usp=drivesdk>

I'll review when the design is complete

We need it to have just that picture. Let's discuss

## issue 7

The twitter issue is not clear to us,so you are requested that please let us clear about this twitter issue and all.

I'll do a go to meeting to show you how it looks. That way it will be clear.

## GPS YOUR ROUTE

### 1. SPORT/ROUTE

### 2. STARTING LOCATION

### 3. DURATION/DESCRIPTION

### 4. MAP ROUTE

Click on the map at your starting location and trace your route with each additional click. Click "Save" to finish.

**SAVE**

We need a date added now everything says  
11-15

It would be #2

Then the other numbers would change accordingly

I added a route in Park City. It was great that it said the route was saved and then it went to the View my routes.  
But the map isn't of Park City or the route I selected. It's of my office building where I was at the time I did the test.

## MY ROUTES

Below are listed the routes you've recorded through either the online system or the Torq'd mobile app. Click on the map for a larger view of the route you recorded.

ICE

### ICE ICE BABY

DATE  
11/15/2013

TIME  
2:3:17

DISTANCE  
2.24 MILES
